

# Friends of Historic Woolsey

## Our Progress to Date

THANK YOU FOR YOUR SUPPORT!

We couldn't do this without you!

### *Water and Electricity*

Water and electricity are now available on the property.

### *Ground Penetrating Radar*

Ground Penetrating Radar Systems identified the location of unmarked graves. While most of the graves are outside of the cemetery fence, some are located inside.

### *Landscaping and Cemetery Clean Up*

The landscaping project includes a memorial garden, providing a place for reflection. White-flowering, heirloom plants sourced from local families will be planted in the garden. Trees limbs were trimmed to prevent damage to the church and graves. Cemetery maintenance and the cleaning of graves is ongoing.

### *Historic Structure Report*

Landmark Preservation Consulting's Historic Structure Report serves as a restoration guide for the historic church built in 1889.

### *Historic Church Restoration*

Volunteers have made significant progress in the removal of non-historic additions inside the church revealing the church's original window size, original door locations, and the tongue and groove walls. Once completed, the church will provide a much-needed community gathering place. Friends of Historic Woolsey will host open houses for the community to witness the restoration.
